

Shutterbug Photography

Photovoice is the process by which individuals can identify and represent people, places and things that are important to them through photography. With each photograph captured, a story is told. This program offers youth the opportunity to engage with their creativity and learn a new medium in order to explore their voices. The participants will use their cameras (including cell phone cameras) to take photos while on a group excursion into the community. Participants will be encouraged to think out of the box and express their unique perspectives on the world. Each session will focus on a different theme, and the group will present their hard work and beautiful snapshots with a vernissage at the end. This program promotes creative expression, social skill building, and increased leisure participation through learning new skills.
